(USA) Manufacturer GameTek Model GPP-ENP02 Date Addicted/Version NTSC No Platform Xbox 360 Release date February 21, 2014 Addicted Rating 84 Hey guys! This is a highly detailed video review for the much acclaimed pinball game Zaccaria Strike Deluxe Pinball Table. Today I am going to be giving you my personal experience of playing this table. Hope you like it. I will be using the normal GIANT PHILLIPS CCFL standard pinball lighting inside my pole ball table. Play in your own private pole. Strike Deluxe Pinball Review Summary The game is an excellent pinball title for all those hard core arcade gamers who want a very realistic pinball experience but still want to blast the competition. The game certainly delivers and is a great purchase for those looking to enhance their pinball table. The game has a very gritty look to it and is not for the faint of heart. The gameplay is sure to challenge you as there are many real time situations that can easily occur in the game. There is a great array of game modes and also different difficulty levels with bosses and ghost balls. The pinball experience here is more than just good. The table version is the Xbox Edition with the standard XLIB ball set. The sound effects are decent and are nicely adjusted for the different angles and rooms. The ambient soundtrack for the game is also a must! The manual play is very easy to handle and the game mechanics and gameplay are straightforward and easy to master. The game does have a couple of minor issues that are all minor and can easily be ignored without deducting from the overall score. The game contains many modes that will challenge you and make this the best pinball game available in the market. The design is AMAZING! If you are looking for a pinball table to grow your pinball collection and experience with pinball, this is the best! It uses the KOEI standard Genuine Pinball 2000 engine which is one of the best pinball engines on the market. Strike Deluxe Pinball Table - Set up I recommend that you set up your own table first. I usually use the Pinball Cabinet DUMMY kit and plan to replace all the original legs and also add some gussets underneath the table to prevent any damage to my table. If you are using the Genesis System or are aware of how to do this, I highly recommend doing this as it will allow you to get the best results and also make your game as customisable as you want.
