Kidgilantes is inspired by many iOS classics such as Kiddragoon and Scribbliez! By continuing to use the familiar gameplay elements, we want to give kids a fun yet casual puzzle experience. Feature List 1. Two-Player Connectivity- A unique game concept, two players will have to work together to save all the animals in the zoos! 2. Free Space Puzzle Design- Kidgilantes consists of a series of objects you can stack on one another. Stack!s are the key to security. What happens if you get caught by the guards? 3. Level Matching Puzzle- Both children and adults will have to work together to get to the correct level to save the animals. 4. Beautiful Design- Kidgilantes makes use of vibrant colors. 5. Intuitive Controls- It's easy to jump from puzzle to puzzle in Kidgilantes. 6. Simple Mobile Game Controls- Kids get to play this puzzle game on their mobile devices! 7. Classic Flavors- Kidgilantes is reminiscent of the classic puzzle game series such as Chalkdren and Scribblez! About The Game Developer: Hikeshi-Fireman is a small game development studio in Japan, supported by a small team of passionate and hard-working individuals. Our studio is passionate about creating family-friendly, easy-to-play, classic puzzle games! Key Features: 1. Two-Player Connectivity: Playing with someone else is essential to playing a game like Kidgilantes. Without it, kids won't have a chance to use their bravery! 2. Free Space Puzzle Design: When you think of a puzzle, you naturally think of a collection of matched items that have some sort of connection. This is the idea behind Kidgilantes. 3. Level Matching Puzzle- It's a nice touch that the difficulty of each level can be adjusted to the age of the player. 4. Beautiful Design- Kidgilantes consists of vibrant colors and characters designed to look like sweets. 5. Intuitive Controls- It's easy to jump from puzzle to puzzle in Kidgilantes. 6. Classic Flavors- Kidgilantes is reminiscent of the classic puzzle game series such as Chalkdren and Scribblez! 7. Simple Mobile Game Controls- Kids get to play this puzzle game on their mobile devices! 8. Support Team and

Uproar is our first game! Its' core idea will be implemented for a year, and we will release a weekly update with our new level. That way, you will always get a glimpse of what's to come. At the same time, we will be able to focus on implementing the core concept of the game, and each week we will be able to playtest it a bit better, and will be able to think about how to improve it even more. We do not have a set release date yet, we are looking for feedback, and would like to hear any ideas and suggestions that you may have for us! Hello, First of all, thank you for taking the time to read through this. I'm the guy behind this game and I have been working on it for the last six months. To sum up it in a few words, Uproar is a 3rd-person MMORPG with elements of rogue-like and RPG genres. It's a very ambitious game, with more than a year of development, which is why we are currently in the prototype stage. The concept of the game is to create a world with 'online' technology, in which players can interact with each other and play the game together. You can play in a traditional multiplayer mode, or go solo with up to two AI companions. There are many features that we want to implement in the game, some of which I hope to explain in the following paragraphs. World Management You play your own character and have your own home, from which you go into dungeons and fight other players. But that is not the only way you will interact with the world. You will also be able to interact with items and people. Your home will have a history, which you can read in journals. People will also be able to read your journals and contribute to the world. You will also be able to talk to each other and meet other people in the game. World PvP In game chat, the world chat, we have a feature that allows you to fight against other players. You can see their health on the'match' screen, so you will know who is weaker. Don't try to exploit someone, though, or face the consequences. If you defeat the opponent, you will be awarded a prize. The more you play, the more prizes you will win. If you play a lot of fights, you will see those prizes and the difficulty rating increase. Prizes will be of c9d1549cdd

Mermaid Princess Rescue is a fun and easy to learn game. The Screenshots of Scam Town should explain to you why we chose this name. We are so far from being ashamed of it, although you probably won't find it on Google Play until we are sure we won't lose our legal fight with it. Well, it's up to Google to decide if our'scam' will become a ban worthy app, but if they decide to remove us, we hope our next game will be called 'You Need To Help The Injured'. Game Overview Like many of you, we wanted to make a game with adventure, puzzle, role playing game and story line in a perfect package. That's why we did a great thing by creating a true multi-modal game, based on the most popular role-playing games of all time. • Random Maps - Explore one of 16 random maps

Very Simple Programming Tutorial - C# With(List) Case A very simple programming tutorial with sample codes.

A Very Simple Programming Tutorial

This is an example on C# coding containing a case statement, a for loop and a few syntax. Where did I get this tutorial from? If you don't believe in this kind of tutorial then you must believe in potential. Potential is something that is there but nothing real, all the tutorials here are going to give you real examples, so you can learn about the learning yourself. This is not a difficult programming tutorial, but it is is going to test your basic knowledge of programming language. It covers topics such as variables, objects, methods, case statement, for loop, string, int, double, etc. Most of the examples are real. So imagine if i teach you something by giving you all the word. It is like I am teaching a child, someone who can't read and I want to help them.
