Q: Como passar uma variável como parâmetro de um RequireJS? Eu preciso pegar um valor que é obtido no meu controller, como assim passo essa variável para o RequireJS? A: Observe o exemplo abaixo: App = require('app'); var app = new App(); var x = app.getVariavel(); module.exports = app; No exemplo, o x será o valor retornado por getVariavel. O App é assim exibido porque ele é uma função. App é minha app: var App = function App(){ this.variavel = 'over here'; }; module.exports = App; to err on the side of caution.” (App’x at 318.) We conclude that, if at all, the district court should have increased Castellon’s base offense level by only two, not three, levels. Because he was initially charged with one count of threatening a federal officer, the district court should have increased his base offense level by two levels, rather than three, pursuant to U.S.S.G. § 3A1.2. The district court’s application of a three-level enhancement for brandishing a firearm in connection with the shooting--when the evidence shows only that Castellon brandished a gun in the presence of police and then voluntarily surrendered without incident--was in error. Because the district court did not properly apply the sentencing guidelines, resentencing is required. B. Count Two: Carjacking Although we conclude that the district court did not err in its application of the sentencing 6d1f23a050
