That is why I got "Slui 4" error while trying to activate Windows 10. Windows 10 activation computer repair. How to fix Windows 10 activation server error? error. 43 user(s) like this. There is a registration server problem, you need to access to the center with "slui 4" into the command line. How to fix Windows 10 activation in case it won't work with a phone call? How to Fix Windows 10 Activation Server Error Code 0xC004f074. Microsoft Windows 10 activations, there is a problem with the WU (windows update) server. . A: I had the same problem all u have t do is type SLUI 4 on cmd and I'll get a blue screen and a Microsoft number, so all u have to do is call in and . This is a known issue. From KB3141163 - Windows Update Client 10: There is a potential issue with Windows Update and Windows Defender that may cause local updates to fail for computers running Windows 10. This is currently only a problem for computers using the Windows-10-No-Phone-10-Thru-WSL.iso ISO image. Workaround: If you are running Windows 10 in ThruWSL mode, do not use Windows 10 via the Update Manager. Connect your Windows 10 in ThruWSL by using the Hyper-V window in Windows 8.1 or Windows 10. After opening Hyper-V, install the latest updates on Hyper-V. The updates may install automatically or you may need to restart your computer. When you return to Windows 10 via the Windows Store, run the WindowsUpdate command in the Command Prompt. (type "C:\Windows\system32\windowsupdate.exe" /updatemode /noreboot)." Since you are using a Windows 10 ISO, installing updates automatically with Windows Update is not an option. Windows 10 (build version 1607) c6a93da74d
